

# CHECKOFF RESEARCH SUCCESSSES IN OHIO

“I’m proud that the Ohio Soybean Council uses my soy checkoff dollars to fund projects such as aphid research at The Ohio State University. This research found there are different types of aphids in the Midwest, and some resistant soybean traits available to farmers don’t actually work on every type, which helps me and other farmers match the right soybean varieties and traits that work best on our individual farms. I support the soy checkoff because of all the advancements that have been made to help Ohio farmers become more productive and profitable.”

- Dale Profit, soybean farmer from Van Wert County.

The Ohio Soybean Council (OSC) funds a variety of projects each year to increase the profitability of your soybean operation. Take a look below at some of the areas in which OSC funds research on behalf of soybean farmers in Ohio.
