

# Steve Culman

## Project Title

Soil Fertility and P&K Recommendations

## Biography

Steve Culman joined Ohio State in 2014 as the State Specialist in Soil Fertility. He has a B.A. in Biology from Thomas More College in Kentucky and a M.S. in Soil Science and a Ph.D. in Agronomy from Cornell University. Culman has worked in field crop systems in Michigan, New York, Kansas and California. He is originally from Ohio and is happy to be back home.

## Project Description

Culman is leading a multidisciplinary team project on soybean fertility with Laura Lindsey, Andy Michel, Anne Dorrance and Greg LaBarge from OSU. The project is re-evaluating the Tri-State Recommendations for P and K in soybeans as well as examining the impacts of soil fertility on soybean disease and insect predation. The work involves on-farm strip trials, OSU research farm plots and greenhouse studies and started in 2014.
